ABOUT ME

Technology-Agnostic Solution Architect and Senior Engineer with 10+ years of enterprise software experience and 6 x Salesforce certifications. Expert in translating complex business requirements into resilient, event-driven platform architectures, process orchestration, and multi-system integration pipelines across iPaaS middleware, cloud microservices, databases, legacy systems, and external platforms. Track record leading SDLC execution, technical discovery, multi-org governance, and cross-functional stakeholder alignment from design through UAT and production rollout.

WORK EXPERIENCE

PRINCIPAL APPLICATION SPECIALIST – GEN – 10/2024 – 05/2026 – INDIA

- **Lead-to-Cash & PaaS Custom Architecture:** Architected custom Lead-to-Cash, subscription management, and recurring billing logic on Salesforce PaaS for a mid-size SaaS employee benefits platform, engineering object-oriented Apex trigger frameworks and high-throughput asynchronous batch queues.
- **ERP & Revenue Reconciliation Pipelines:** Designed asynchronous REST integration pipelines via Boomi iPaaS, decoupling core CRM from backend ERP and financial ledgers to enable real-time revenue reconciliation across multisystem data flows.
- **DevOps, Security & Governance:** Automated multi-environment CI/CD deployment pipelines using Git branching strategies, enforcing automated peer code reviews, security testing, and granular role/sharing access controls.

IT BUSINESS TECHNICAL & INTEGRATION CONSULTANT – VOLKSWAGEN GROUP SERVICES GMBH – 11/2022 – 05/2024 – GERMANY

- **Process Simplification & Global Template Delivery:** Streamlined complex case management, entitlement licensing, and service delivery workflows into a standardized global Service Cloud core template across a multi-org enterprise landscape for a global automotive leader.
- **Integration Requirements & iPaaS Data Mapping:** Conducted technical discovery to map business data structures, REST/SOAP endpoints, and payload schemas for MuleSoft integration teams connecting global OEM and NSC platforms.
- **Release Governance & Stakeholder Alignment:** Led Agile discovery, release management, and UAT deployments, acting as the technical bridge to align global business stakeholders with cross-functional delivery teams.

SENIOR APPLICATION ENGINEER – TOMTOM – 01/2021 – 10/2022 – INDIA

- **B2B Revenue Operations & Connector Integration:** Engineered core Sales Cloud workflows covering Lead-to-Quote pipelines, multi-currency Price Books, and custom opportunity splits for a global location technology provider, while configuring the Pardot (B2B Account Engagement) connector for automated lead scoring and engagement history sync.
- **Cloud Microservices & Event Integration:** Developed asynchronous HTTP REST handlers and callout frameworks connecting core CRM with Azure-deployed microservices for real-time product catalog and regional matrix synchronization.
- **Quote-to-Cash & Interactive SPA Quoting:** Built a Salesforce CPQ proof-of-concept featuring custom Single Page Application (LWC/SPA) quoting interfaces, complex multi-currency pricing logic, and downstream SAP billing integration.
- **Enterprise Data Pipelines:** Engineered high-volume data migration pipelines using Data Loader, custom validation rules, and Apex batch scripts for automated data cleansing and reconciliation.

SENIOR PROJECT ENGINEER – WIPRO INDIA LTD – 11/2019 – 01/2021 – INDIA

- **Customer Portals & SPA Engineering:** Developed responsive single-page web components (Aura/SPA) and secure server-side Apex controllers for customer-facing B2C Experience Cloud portals serving a major global enterprise client.
- **Identity Management (IAM) & Web Analytics:** Programmed custom Apex Registration Handlers and Auth Providers to implement Single Sign-On (SSO), embedding Adobe and Google Analytics for user telemetry and interaction logging.

IT APPLICATION SPECIALIST – SYMANTEC – 01/2016 – 10/2019 – INDIA

- Service Architecture & Support Engineering: Delivered foundational platform engineering within a global cybersecurity enterprise, configuring Omni-Channel routing, Salesforce Console, and custom Apex triggers/helper classes for Entitlement Management.
- Chatbot & Middleware Web Services: Built custom Apex web service handlers and REST controllers to integrate Microsoft Bot Framework and Bomgar remote support systems with core service desk management.
- Quality & Engineering Standards: Maintained >85% Apex unit test coverage, resolved complex defect tickets across Agile sprints, and delivered continuous platform enhancements.

PROJECTS

Public Project Self Learning Production and Observability-Oriented Distributed Inventory Service (Personal Architecture Project)

- Distributed System Patterns: Architected an event-driven distributed inventory service applying CQRS, optimistic locking, idempotency, and resilience patterns to handle concurrent transactions in e-commerce platforms.
- Observability & Architecture: Designed a clean Ports & Adapters (Hexagonal) architecture incorporating distributed tracing, structured logging, and metrics monitoring to maintain system observability across decoupled microservices.

SKILLS

System Architecture & Design :

Distributed Systems | Microservices | Event-Driven Architecture | REST/SOAP APIs | CQRS | Data Modeling | Design Patterns | Process Orchestration | Apex (Triggers, Batch, Async, Queues, Controllers) | Enterprise Integration Patterns (EIP) | Fault Tolerance & Resilience

Software Engineering & Execution :

Object-Oriented Design (OOP / SOLID Principles) | Test-Driven Development (TDD) | Apex (Java-based Server Logic) | JavaScript (ES6+) | Web Components / Single Page Applications (LWC/SPA) | System Observability | Front-End Frameworks (Aura) | SQL

Platforms & Middleware :

Enterprise CRM (Sales, Service, CPQ), | PaaS Custom Engineering | MuleSoft, Boomi iPaaS Engineering | Git/GitHub, CI/CD Pipelines | Agile/Scrum | Azure Cloud Services

Certifications :

Salesforce Certified Platform Developer I & II | Salesforce CPQ Specialist | Salesforce Service Cloud Consultant | Salesforce Administrator | Salesforce Platform App Builder

EDUCATION AND TRAINING

2014 – 2016

MASTERS DEGREE IN COMPUTER APPLICATION (COMPUTER ENGINEERING) Savitribai Phule Pune University(Computer Science)

2009 – 2011

BACHELORS DEGREE IN COMPUTER APPLICATION (COMPUTER SCIENCE) Savitribai Phule Pune University
